– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

Applicant's election with traverse of Group I, claims 1-3, in the reply filed on January 23, 2006 is acknowledged. The traversal is on the ground(s) that claim 1 is generic. This is not found persuasive because each independent claim describes features not found in the other Groups. The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by US20020141473A1 to Cordingley et al or in view of US 20020170898A1 to Ehrmann et al. Cordingley et al describe [0012] a linearly or elliptically polarized laser beam and describe [0048] [0049] a diffraction limited spot and describe the use thereof for machining electronic substrates. Ehrmann et al describe a diffraction limited system for machining and describe [0104] improving processing speed with a modified elliptical spot and fluence at the workpiece. Ehrmann et al describe elliptical polarization of the beam [0046] [0053] (claims 13 and 20).

Claims 1-3 are rejected under 35 U.S.C. 102(a) as being anticipated by EP1338371A. See Figure 39 for the elliptical spot.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Geyer and Sokol et al describe elliptical spot laser systems and methods.
